In the next minute, 30 people will have a stroke.

Half will die. Of those that survive, two thirds will be affected by long-term complications and disabilities.

Together we can change this 🤝🤝🤝

Thanks to major advances across every aspect of care, most strokes are:

- 🛡️ Preventable
- 🕒 Treatable
- 💙 Recoverable

We have the tools.
What we need is action.

This September, world leaders will meet at the United Nations in New York to set a new way forward for non-communicable diseases.

YOU can help put stroke on the agenda.

Sign our letter of support today and join the call for [#StrokeActionNow](#).
